A Young Japanese Man Visits Other Planets [PART 1] by Hachiro Kubota

No one will dispute the fact that there is no life on other planets in our solar system but Earth. In order to prove this, some space probes have played important roles in the research of planets Venus, Saturn, Jupiter, et cetera.

However, there have been a number of contactees in many countries claiming to have gone aboard space ships from other worlds belonging to our solar system. If these artificial flying machines really come from the planets in outer space, we must recognize that highly advanced civilizations exist on some of them. Do the U.S. and U.S.S.R. cover up the astounding facts for fear that the world will be stricken by a serious panic?

George Adamski, an American contactee, claimed in his famous books that he contacted space people from other planets in our solar system. In addition to the controversial contact stories, he described his visits to planets Venus and Saturn, and was surprised to see greatly advanced societies there. Ridiculous? No. Strange as it may seem, there have been a large number of sightings of Adamski-type flying saucers as well as cigar-shaped mother ships all over the world. Recently, a young girl (member of GAP-Japan) witnessed with her mother an Adamski-type saucer having three balls at the bottom hovering over a mountain for about an hour! This happened in Asahikawa, Hokkaido in the summer of 1986. It can be said that there is sufficient evidence to conclude these sightings as an implication that Adamski's stories were absolutely true!

In addition, we have an amazing story of a Japanese contactee named Shoichi Harukawa (pseudonym), 26, who also claims

to have gone aboard a flying saucer and the mother ship many times. He was supposedly taken to Venus, Mercury and an unknown planet in another solar system in the direction of the constellation of Cassiopeia!

He now lives in a small city in the Tokai district of Japan and works as a government official. If it is of any concern his father is in a high position at the prefectural office. Besides being very sincere and honest, he is an excellent telepathist showing wonderful abilities of clairvoyance and perception of man's 'aura' as well.

Now, this is his own story of which he personally told this writer on several occasions. We have had it published through GAP-Japan Newsletter in a serial form thus creating a sensation in the field of UFO in Japan. So, we have decided to print his wonderful story in our English bulletin. The questioner is Hachiro Kubota, a writer and representative of GAP-Japan.

Sending Out His Thoughts to the Starry Sky

K: What prompted you to contact the space people?

H: I was a second year student at a junior high school when I awakened to the wonders of space. At first I lived in a large city, and then moved to the country surrounded by mountains. At school my classmates often teased me because I moved from the city. I had no friends then, and was very sad and lonely in my state of affairs. One day I read about 'space' and strongly felt like making an appeal to someone in space for response. I did not know anything about George Adamski at the time. Each night for a month, I sent out my in-

tense thoughts which was almost like a prayer. I sent a message to the starry sky as follows: "If anyone recognizes me on a small planet in space that is Earth, please show me some kind of a reaction."

I continued to do it very hard every night, and on the thirtieth day I sent out my thoughts for about an hour, but I could not find anything in the dark sky as usual. I almost gave up, and as I was trying to shut the window of my room, I saw an orange object fly across the sky leaving a sine curve. I was surprised to see it thinking that I had my desire fulfilled at long last. This took place when I was a second year student (14 years old) at the junior high school.

After that, I earnestly kept on sending out messages by telepathy every day. It seemed to me that even a few changes in my thoughts were transmitted to the object, for when my heart sank within me, the UFO did not appear. When I tried to cheer up, the UFO flew again.

At first the UFO was so small that I almost could not see it. But the object became bigger and bigger until it finally became one large object like this (he shows a large circle with the fingers of his hands). When it descended, it was milk white or pink. When it approached me, I told the object by telepathy, "Turn at a right angle!" Then it suddenly turned at a right angle as I wished. The object appeared to move according to my mind and I became a little afraid. Had I been connected with a phantom? But I enjoyed it so much that I kept on doing it.

By the time I was a third year student, I came to see large UFOs. For example, I incidentally saw a huge hull moving endlessly between the rain clouds one day. I supposed it was a giant mother ship, and I was greatly moved by the sight, feeling supreme bliss.

The Beginning of a Telepathic Communication

One night I went to bed at a little past 11:00. As it was dark in my room, it naturally ought to be dark if I closed my eyes. But strangely enough, it seemed very bright even though my eyes were shut. I was surprised at the queer situation at first. What is more, I could see some black letters in my eyes clearly. There were seven letters. I jumped out of bed, turned on the light, and wrote down the letters in my notebook one by one. While I was writing them, I was still able to see the letters when I closed my eyes. When I finished it, all the letters disappeared. This was

the very first step in my reception of telepathy, and their message was mainly conveyed in figures. Meanwhile I came to succeed in the transmission and reception of messages by using sentences. I wrote down what I thought in my notebook and concentrated hard. Then, space people who were supposedly in a space ship hovering somewhere in space would catch my telepathic thought wave and send their message back to me. This was a rather short stage, and after that I finally came to contact the space man.

The First Contact

On one Sunday morning, I planned to go to the bookstore later on that day. But by noon, I had a strange feeling that I must go to the city of Shizuoka. The strong feeling was beyond description. Soon I went to the city, and strolled around the downtown area looking at the store windows.

As a man came walking from the opposite direction, I suddenly felt as if I was being pulled by him. He was apparently an ordinary business man wearing a reddish necktie and blue clothes. The cut of his suit was very stylish. My first impression was that he kept himself clean. Anyway he walked towards me, so I tried to make way for him. But then again he came to me so I tried to avoid him once more. For the nth time, he walked in my direction. I realized that he was interested in me and I asked him by telepathy, "Are you from space?". He answered, "Yes." in Japanese by uttering the word through his mouth I was much surprised to hear him.

The Space Man Knew Everything about the Contactee

Patting me gently on the shoulder, he said, "Hello, come along with me." We went down to the underground market in front of the Shizuoka station, and dropped into a quiet coffee shop to talk. I talked about my strange experiences which I thought had to do something with him. To my surprise, he knew everything about the secret experiences such as my own sightings and telepathic phenomenas. He said, "We (space people) have misgivings about the current state of Earth, but we don't want to interfere with people's affairs by giving them answers to their ordeals from the beginning. However, we can give you some hints to stimulate your progress. That's the only way to save you."

We talked for about two hours and I said good-bye to him. I met six space people in all from other planets since then for

four years, including a woman.

K: When did you first contact him?

H: It was when I was about to graduate from junior high school (ten years ago). I learned so much from the space people. One day he sent a telepathic message for me to bring the map of Japan. When I went to meet him with the map, he put marks on several places, and said, "Remember the places." After that I sometimes sent messages by telepathy to one of the marked places, and they sent back answers. The marked place was their secret base. They told me how they were maneuvering and what their network was like in Japan. It was a marvelous network. If you could skillfully send a message by telepathy to one of their bases, you would be able to know where UFOs were flying over Japan and their purposes. It was very interesting.

Tremendous Civilizations on Other Planets

K: Were the six space people whom you contacted all of the Japanese type?

H: No, one space man was a tall, white man who was a blond of fine texture, while others were 165 to 170 centimeters tall in stature. They were of average height. The beauty point was that they appeared as though they just had their hair cut at a barber. Their skin were very smooth and beardless.

K: You said you contacted a woman from another planet. Was she just like a Japanese, too?

H: Yes, she was. She was a brunette and over 165 centimeters tall.

K: Were all of them from planet Venus?

H: No. Three were Venusians and others were from Mercury. The man whom I met at first was from Mercury.

K: Then, planet Mercury has a highly advanced civilization, hasn't it?

H: Oh yes. This planet has a tremendous one. I knew because I was taken there. There were lots of awfully beautiful domes which glistened like rainbows. But when I entered a house, I could see the outside as if there were no walls. That was a marvel. There were two kinds of doors in the house—sliding doors and double-leafed hinged doors. I found such doors in their space ships, too. In any case, when the doors were shut, I couldn't see any seam or a joint on the wall. This was also very strange. Rooms were not brightly lighted up, but were illuminated so softly that I could not recognize the source of light. This was another wonder.

K: Didn't you read Adamski's books at the time?

H: No, never. I was advised by my friends to read his books, but I felt I didn't have to read them. It was very recent that I found them at a book store, and obtained Volume 1 of Adamski's complete works.

[The Japanese edition of 7 volumes of Adamski's complete works are now published in Japan. They were all translated by this writer.]

And for the first time, I read and understood his concept.

K: Did you visit other planets besides Mercury?

H: Yes, I was taken to planet Venus. In addition, I was invited to an unknown planet existing in the direction of constellation Cassiopeia, which belongs to another solar system. To my surprise, all the plants were very big on the unknown planet. Insects and animals were large, too. Bees were as big as this (he shows a large circle with his hands). Interestingly enough, the bees don't have any stings. Also, I saw a plant similar to a rose without the thorns. Therefore, I believed that plants as well as animals had evolved without the instinct to protect themselves. I might add that people on the planet were all about 2 meters tall on the average. They looked like Caucasians and were very pleasant people. All were like movie stars with handsome features.

Buildings were quite strange in style because they resembled the Tower of Babel in ancient times. I felt as if all this were a dream. So I asked the space people, "Why did you bring me to this planet?" They told me that the planet was very much like Earth a long time ago, but had evolved ideally since then. I asked half-wishing "Is there a possibility that Earth will evolve like that?" They said, "Yes, there is." I was most delighted to hear the answer.

That Blue Planet is the Most Important One for You

As I continued to contact with the space people, I became much displeased with Earth. I especially disliked the people on Earth because I thought they made our planet seem very, very low compared to their standard. Right after I told them about it, they said, "It is that blue planet (Earth) where you must carry out your mission." I realized that I must because that is my home planet. He added, "You must live a pleasant life on that blue planet. Descendants will steadily increase from you. As you are controlling their way of life now, you have an important reason for 'being' there. Don't think you can't do anything at all because you are alone. Things you create will be-

come vast ones in the future."

It seems to me that they knew all about my henceforth coming my future. I was also sure that they knew all about my past lives. I suppose the reason why I came to contact with them was because of my past lives.

K: Then you were an inhabitant on another planet at one time in your past, weren't you? What planet was that?

H: I think it was the planet in the direction of constellation Cassiopeia to which I was taken.

K: And then, were you reborn on Earth?

H: Yes. While flying straight in the direction of constellation Cassiopeia, they showed me a spectacular view of space. There were small windows as well as a screen inside the ship, allowing us to see a very beautiful scene.

Wonderful Technology to Bend 'Light'

They have a tremendous technology to control 'light'. A space man said, "Suppose ten friends of yours are standing in line. We can let two people witness our UFOs (space ships) as we choose." That is not a technology to produce illusions in their minds. The space people can control to make only two persons feel the light.

Generally speaking, light doesn't bend at a right angle while traveling, but their incredible technology can actually do this! Therefore, they are able to make a huge cigar-shaped mother ship having a length of about 1 kilometers invisible to the human naked eyes. This is easy for the space men. When the particles of light come from behind the fuselage, they calculate the volume of light energy. A duplicate of this light is created and sent out from the opposite side. In result, the light travels as though it had passed through empty space, and no one can see the ship in the sky.

Besides this, I know of other stunts they show sometimes. For example, their space ships can create clouds in the sky, and make various types of statues out of them. They can create a statue of a Goddess that is very interesting. What's more, they make Adamski-type flying saucers by using these artificial clouds. I think you should say that they are works of art. [During the conversation, this writer (Kubota) suddenly remembered witnessing an astounding statue which appeared in the sky in Hokkaido a few years ago. We can say the statue was one of space people's wonderful 'sky sculptures!']

I think space people have seized all the essential elements of matter. They told me

that people on Earth have the wrong conception of science. If we don't change fundamentally our way of thinking about science, we will never understand all of it. Above all, they emphasized that we should scientifically turn our attention to how light and electric waves can travel in space. According to them, there is an 'unipolar magnetism' in the magnetic field. In other words, besides the North and South poles, there exists a magnetism having only one pole. It exists in cosmic space in abundance rotating very rapidly, but does not mingle with the N and S poles. However, when a certain amount of light energy is added to it, the unipolar magnetism can 'convey' energy in a definite direction. That is why all the scientists should try to find the unipolar magnetism.

Infestation of Fake Contactees

K: Were all the flying saucers and mother ships you went aboard from planet Venus?

H: No, some of them are from Venus, and others Mercury. I went aboard many times. I left Earth 14 to 15 times. On the space ships, I sat in company with strangers from Earth. I think there have been a lot of people who went aboard these space ships. But they don't reveal their experiences. In the light of that, Mr. Adamski seemed to have great courage and a stout heart. If a man going aboard a flying saucer tells the public about it, he will be attacked and eventually wrecked by them.

K: You are right. If he is not careful, he may be killed by science groups.

H: Yes. As a matter of fact, I had a thin time in the past. Some men in black appeared around me from nowhere when I was contacting, and were deliberately standing at a place to be seen. As this was a great pressure to me, I was often oppressed with fear. But these days their appearances are sparse. I think they have changed their plan in order not to make the public believe the existence of UFOs. Also, the men in black seemed to have recognized that the control of information is good enough for them. Therefore, instead of being nervous, they have only to make up false contactees talking through their hats. Then genuine contact men are looked upon as lunatics, and neglected by the public. There are more than a few would-be contactees being manipulated by wirepullers. Space people don't point out false contactees, but I can telepathically recognize them by 'waves' being emitted. I can also recognize whether UFO photographs are genuine or not by receiving impressions (waves) from them. [Then

Mr. Harukawa told this writer about two would-be contact men in Europe. According to him, both of them are downright fakes.]

Important Ability of Seeing 'Aura'

K: You said when you see a contactee, you can tell whether he is genuine or not by perceiving his 'waves', or frequencies. Can you do this because of aura?

H: Yes, it is the aura which I can see. A man who is able to contact true space people can spot the false space man because he can see the man's aura. If the strange is not a true space man, he doesn't have the proper aura. If you want to see a man's aura, you must have a highly developed ability.

K: When were you able to see 'human aura' at first?

H: It was when I began to contact the space man directly. I mentally became confused at the time, because of the various telepathic phenomena. For example, when I held a cup at a coffee shop, I felt the feeling of a man who held it before. Various telepathic phenomena brought on much strain and I was forced to seek advice from the psychics. When this ended in vain I realized that I was fighting against myself. In the meantime I started to control my telepathic ability by using a mental 'switch'. When I want to use telepathy, I would just turn on the 'switch' in my mind. If I don't want to, I can keep it out within me. At last I came to feel at ease.

Space people have a wonderful ability to disappear. That's easy as a pie for them. They cut off light, making their figures invisible. This phenomenon is apt to be looked upon as 'psychic'. You must think that this is quite different from the psychic phenomenon, but the point is absolutely scientific.

I sometimes happen to see a space man in town who doesn't have a duty to contact me. As I can see his aura, I know that he is a genuine space man. Their auras have the characteristic colors of silver or gold. It is so beautiful that it shines outstandingly even in a crowd. One day I saw a space man at the underground market in the city of Shizuoka. I ran after him. But he suddenly disappeared just as he turned the street corner. It was a large square, but I couldn't see him again. A space man who doesn't have a purpose to contact me tries to keep away because he will be in danger.

Change the Dark Thought into the Bright Thought

They said, "This skill to disappear is never beyond the province of science. You can do it, too. Practice it believing that

man can do so. It is not a dream nor an ideal, but reality. You should realize it. That is the point in your progress. Earthmen have been lazy at their efforts. You know, your world does have its disadvantages. What's worse, the civilization on Earth is erring from the right path. So all of you should change the negative or pessimistic visions into positive ones. You must always think that all things will change to the better. It is very important for you."

When you look at an object or anything (pointing at a glass of tomato juice on the table), there are two elements: the positive or useful and the negative or useless. I hear however useless it may be, the two elements exist. So even if this tomato juice is poisonous, a certain energy added to those elements can change the juice into a positive or useful state. Therefore, if there is a negative or useless thing, you should think of how to make it positive or useful. Whatever you see, you must believe that it will become better, positive or useful. According to the space people, it is especially true of man. They said, "No matter how cruel a man may be, or whatever absurd idea a man may be, it is most important for you to have a strong faith that he will certainly become a great man in the future! But people on Earth have a very poor technique on this kind of thinking. Don't blame or judge others with the simple conception of right and wrong. But when the power to become vicious on the part of others is too strong, you will be beaten. So, you must become very powerful yourself." I think the above is the most excellent teaching the space people have ever passed on to me.

Much Difference Between the Frequencies of Space People and Those of Earthmen

K: When did you visit planet Venus?

H: I was a second year student in high school when I was first taken to Venus. It was summer at the time, and so was Venus.

[Mr. Harukawa told me about it lightly as though he had gone to a resort area on summer vacation. Though he did not seem to want to tell this writer about the place where he went aboard a flying saucer, I had an idea about it. The heights near Mt. Fuji is the best place for the saucer to land. This writer used to go there in order to contact UFOs.]

K: Did you leave for Venus on a scout ship at night?

H: One evening, as I was riding on a bus, I suddenly felt like getting off at a certain bus stop. By receiving a telepathic message from the space people and I walked to a lonely place. All this was guided by telep-

athy from a saucer having in the sky.

Every time I went aboard flying saucers and mother ships, I felt as if a wind was passing through my body. I suppose they were taking a necessary measure for me in order to change the frequencies in my body. One time I threw up what I had eaten the moment I got on the flying saucer. A space man brought a container which looked like a polyethylene bucket, and told me to throw up in it. Interestingly enough, there was a kind of liquid in the container. To my surprise, when I threw up, the liquid was changed into clear water! He asked me, "Do you know the reason why you threw up?" I answered, "No, I don't know." He explained, "Usually, we alter the frequencies of the Earthmen's body before they get on our ship. But this time we didn't do it, so you threw up." In other words, as there is much difference between our frequencies, a kind of catharsis suddenly took place within my body.

Earthman's Thought Waves Reach Space People by Seeing Photographs of UFOs

While they often altered my frequencies, my power to see a man's aura gradually became stronger. Aura (a kind of rays of magnetic force emitted from a man's body as well as all things) has an interesting nature. When a man having a strong aura is in the company of a weaker man, some of the stronger aura is pulled by the lesser one, and both are inclined to be even. I think the reason why the space people don't openly make their appearances is quite apparent. The moment they are identified by Earthmen, exchange of both energy may begin, and the space people's energy will be absorbed by the other. The space people said, "Taking photographs of UFOs by Earthmen is a serious matter for us." This means that the Earthmen's thought waves will be sent to UFOs in the process, and they will have to protect themselves by keeping the thought waves from invading. [Adamski's wife Mary appeared as a little girl on planet Venus while she was reborn. When she met her former husband there, she asked him not to take a photograph of her for the same reason. He writes this story in his wonderful report 'My Trip to Planet Venus']

A Flying Saucer is Started by Man's Thought Waves

K: In Adamski's book 'Inside the Space Ships', drawings of the interior of Venusian and Saturnian scout ships, as well as that of the mother ships were shown. Do you think the drawings are true?

H: Yes, they are the very same ones that

I saw! There was a thick magnetic pole in the center of the saucer. They have made various new type ones since then. I even have an experience in piloting a flying saucer! I was intrigued at the function of the screen at the control panel. Standing in front of it, I visualized a certain pattern in my mind and sent it to the screen. Then a certain figure appeared on the screen and the switch was on. If you can't visualize a pattern in your mind precisely, you will not be able to control the saucer. In this way, the flying saucer moves according to the pilot's thought. You will feel as though it has become a part of your body. It is an incredible technology. I'm sorry I can't tell you about the propelling power here. I once went aboard an Adamski-type saucer alone. The space people told me to send an image of a lozenge to the screen, but I couldn't do it successfully. The pattern on the screen lost its shape, becoming a square or a triangle indefinitely at first. When I gradually became free from all other thoughts, the pattern on the screen transformed into an accurate lozenge. There was an apparatus similar to our television set which showed my saucer flying. The picture on the screen was being taken by a mother ship hovering near, and sent to the saucer. I could actually see how my scout ship was flying. When the pattern on the screen is not right, the saucer pitches and rolls. But if the pattern becomes a lozenge, the ship moves smoothly. I think everything about the space people is on a high level.

How To Get What a Man Wants

The space people said, "If you want something or live a life as you wish, you should always visualize it in your mind. Or draw the picture on a piece of paper repeatedly."

K: Following Adamski's teachings from his valuable book, 'Science of Life', all the members of our GAP-Japan know the secret, and have already been practicing it successfully. Lots of miracles have been produced among our members!

H: Oh, really? That's very good!

[Mr. Harukawa seemed to be surprised to hear this writer's information. He was not aware that the teachings he had acquired from the space people were being carried on by a group of Japanese.]

Therefore, I (Harukawa) think a great number of people should practice visualizing an image of a highly advanced Earth. Then Earth will become a better place for sure. It is not up to the countries nor enterprises but to each individual to think and visualize a better world. If the general public accepts

this and practice it, Earth will be changed into an excellent planet. People today need to have a vision of the future, so I am working to enlighten the young people especially. Anyway, I am very pleased that your group (GAP-Japan) has already put it to use.

Incredible Circumstances on Venus

K: By the way, would you tell me about the conditions on planet Venus? According to Adamski, there are many dome-type houses on the planet. Is it true?

H: Yes, Adamski is correct in saying that there are many dome-type houses. But if you see the walls from the inside, you can see the outside through the transparent walls. It's just like a magic mirror! A house can move itself freely, too. I saw a house move into a large crater-like cavity where the earth rose gradually until the house became invisible.

K: Are Venusians of the Oriental type?

H: No, most of them are of the Caucasian type. But quite a few people are Oriental looking. I saw some Japanese who were taken from Japan to work there. Actually quite a few Japanese people were working on planet Venus. At first I was surprised at their Japanese language, so I asked where they came from. They answered, "We were born in Japan."

K: Why were they taken to Venus?

H: I don't know why. I was once asked by the space people to emigrate to Venus. I hear if I am to be taken to Venus, the space people will make my family forget me by using an unknown method. It seemed that my level was to such an extent that I could live on Venus. I certainly had reached a high level in my state of mind at the time. But after careful consideration, I answered, "I will live on Earth because Earth is my home planet." The Venusian smiled, and after that I began to contact the space people directly. I was told that many of the emigrants to Venus were orphans or people having no kith or kin.

K: Do such people have telepathic abilities?

H: Yes, of course! They have a tremendous ability of telepathy. Being able to live on Venus means that they reach the same level as the Venusians.

Like Attracts Like

The space people said, "There are only three laws in the universe: (1) Things repeat themselves. (2) Like attracts like, meaning, a man or a thing having the same quality are attracted to each other. (3) Things exist

with relative properties. They say human relations are in accordance with the law (1). Many people of many countries make disturbances and wars, but in practice friend and foe are alike on the same level. In other words, attractions result from having the same quality. It is so true when it comes to a group of people. They gather together because they are on the same level or have a similar nature. As I said the other day, the reason why I decided to meet you (this writer) is that you have the same quality as mine. I knew it by telepathy.

Frequencies of Mineral Veins

[Mr. Harukawa continued to talk about the frequencies of land, or earth. He said that there are two kinds of land, or earth. That is, there are some land with cosmic frequencies and some others without. A land to which flying saucers often come has something to do with the frequencies of the land. In addition, flying saucers often choose a land where a special mineral vein exists. The frequencies or energy of the mineral vein has something to do with the coming of the saucers.]

He also said that the other Japanese contactees had a special ore respectively. He, himself, had about 50 ores including a very rare one which was given to him by a space man. He gave most of them away to friends as gifts, except for one. It is a blue crystal which was produced on planet Mercury. At the time when a man from Mercury gave it to Mr. Harukawa, the crystal gleamed in blue in the darkness. Now it does not gleam, but when he holds it, he feels a kind of warmth in it.]

K: Were any of the ores you were given by the space people artificially cut?

H: Yes. Some of them were artificially cut. I have studied precious stones and have some knowledge about cutting. The facets of the space people's gems are not as many as the brilliant cut. It seems to me that the space people cut them to produce the ideal frequencies or energy. If you wear such a precious stone, you will have a marvelous sensation of cosmic consciousness. [This writer told him about a crystal pendant which Adamski possessed during his lifetime. In the autumn of 1975, I touched and held the special stone when the late Mrs. Alice Wells showed it to me in Vista, California. She said that a space man gave it to Adamski when he was a youth. Putting it to his chest, the writer felt some warmth to it.] ---According to the space people, if you touch the precious stones, and feel some warmth in them, they are good for you. If

you feel some chilliness, you had better avoid them. In this case I don't mean a physical sensation by saying that, but a mental warmth or chilliness.

A Climb Up to the High Level

K:How do the space people evaluate UFO research groups on Earth?

H:They don't evaluate any groups at all. They are only appealing to the public on Earth. Though their level of humanity is extremely high compared to ours (raising

his hand highly), they are making an effort to let us elevate to their standard by saying "Earthmen, climb up here!" This depends upon our wish to progress within the power of our souls. They always prepare a high standard which we must reach. Just as a small lamp in a remote place is a great help to a man walking in the darkness, the ideals of the space people will be of tremendous help to Earthmen. Their appearance in the sky may be only a small lamp, but I believe it will be a great salvation to us some day. (Continued to the next issue.)

JAL Captain Reports UFO Sighting Over Alaska

A Japan Air Lines captain has reported he witnessed UFOs while flying over Alaska in November, 1986.

—Cap. Kenji Terauchi, 47, said he saw a total of three UFOs flying near his JAL jumbo jet on a special cargo flight en route from Paris to Tokyo via Anchorage, in the evening of November 17.

The objects were visible for about 50 minutes just before the jet was about to land at Anchorage Airport, he said.

Besides Terauchi, the copilot, Takanori Tamefuji, and flight engineer, Yoshio Tsukuda, were also in the cockpit. Both of them confirmed that either there were some unaccounted-for objects flying near the airplane or they saw some strange lights in the sky.

Terauchi has already reported the case to JAL's main office in Tokyo and to the Federal Aviation Administration (FAA) in the United States.

JAL authorities have not gone further into the matter.

A spokesman for the North American Air Defense Command (NORAD) commented that it has received no information concerning UFOs in the Alaska region around Nov. 17.

According to Terauchi, he witnessed two unidentifiable lights, one about 3.6 to 5.4 km in front of the JAL cargo jet and to the left, and the other about 600 meters below the airplane.

He said he saw the lights at around 5:10 p.m., when the airplane was flying at a speed of 768 k.p.h. to the north-northeast of Anchorage.

Seeing that the lights moved in a different way from his aircraft, Captain Terauchi contacted Anchorage air traffic control, which answered that only the JAL aircraft was detected on the ground rader.

About 10 minutes later, the two bright objects moved to within 150 or 300 meters in front of the plane, illuminating the cock-

pit for several seconds as though it were daytime, Terauchi said.

"The objects were cube-shaped and about the same size as the fuselage of a DC-8 passenger jet, illuminated by an incalculable number of something that looked like incandescent lights," said Terauchi.

After the first two lights disappeared from his sight for a moment, another two lights appeared 60 degrees to the left and flying side by side with the JAL jet, the pilot said.

A meteorological rader in the cockpit, applied horizontally, detected an object about 1.5 to two times as large as jumbo jet, flying 12.6 to 14.4 km in front of the JAL plane, although the Anchorage air traffic control repeated that its rader could detect nothing, Terauchi said.

Terauchi added that he could see the object in silhouette against the lights of the city below.

He then noticed that the two lights were part of a huge ball-shaped object several dozen times as large as a jumbo jet, he continued.

The object continued to follow the JAL jet until it suddenly disappeared from sight when the plane was flying 270 km to the north of Anchorage, he said. The JAL craft landed at Anchorage Airport at 6:24 p.m.

Yoshio Iwao, head of JAL's Boeing 747 operating crew section, confirmed he had received an outline of the incident from Terauchi in a telephone call from Anchorage on Nov. 18, Japan time.

JAL, however, decided not to pursue the matter further, because it expected to find no clear explanation by investigation, Iwao said. No written report was submitted by Cap. Terauchi, he added.

Copilot Tamefuji confirmed that he saw one of the two flying objects from the cockpit and that it was detected on the cockpit rader. He added that he could not see it.

Questions & Answers by George Adamski

This Q & A was published by George Adamski in 1957 and sent to his co-workers all over the world. This contains much valuable information on UFO issues even now. (Editor, Uc)

Q1: Have you published another book since *INSIDE THE SPACE SHIPS*?

A: No. Work was started on one, but I was advised by the Brothers (space people from other planets. Editor Uc) to discontinue this in favor of the scientific program. They said much valuable information was contained in *'INSIDE THE SPACE SHIPS'* which would be helpful to the world., if we could endeavor to live according to the wisdom given therein. Until the peoples of Earth show a greater understanding and compassion, with a willingness to change their thinking habits and actions toward each other, little more can be given.

Through growth and steadfastness to the laws of the Cosmos, they have attained a happier way of life, but they understand this must not be forced upon another. Each must earn this understanding for himself. And this is an individual problem. For a state, a nation, or a world, is only as strong and as happy as its people.

Each form is a center of influence, effecting everything it contacts. So, as each person improves his own way of life, learning to be true to himself, he will help his fellowmen accordingly. For it is the daily living that is all important! And each must do this for himself.

Q2: Do you have information from the space Brothers regarding the Russian satellite, Spu-tnik?

A: No. To the present date (October 18, 1957) I have not had a meeting with the space people since the launching of Russia's baby moon. However, the next time we meet I will make inquiries about this matter and include what information they give me in the next number of Questions and Answers.

One thing I do know, the 'shell' first reported to be following the little satellite, and now said to be leading it, is a space ship! A check of information released on this subject will show reports of more than one 'shell' orbiting with the Russian moon.

During a meeting with the space people not long ago, we discussed the possibility of some nation succeeding in getting a device to orbit around our planet. At that time they told me that when any country did succeed with such a project, it would be watched closely. If it proved to be purely scientific, they would leave it alone. This seems to be their present policy.

Q3: Why didn't the space people help us get out a satellite first?

A: According to information I have received, not directly from Russia herself, but from people in other nations who are in touch with Russia, there have been many sightings and a number of landings in that country. From all I have been able to learn, some governments have given instructions to their Air Forces to fire upon space craft. And no nation can expect help from people at whom they shoot, and whose information they ignore.

Remember, the space visitors know no divisions and support no particular class. They are non-political and non-sectarian, recognizing all mankind as brothers and sisters. Their interest lies in humanity as a whole wherever they find it; whether on our planet or elsewhere in the vast universe. But I can assure you, they will support no one in hostility.

Q4: Why are space people coming our way?

A: Their presence in such numbers at this particular time is largely for scientific study. By now almost everybody has heard something about the change our planet, Earth, is making on its axis. This is a natural phenomenon which takes place at regular cycles on all planets. They are observing this closely, since a change anywhere in a system affects the whole system to some degree. It may also be noted, their present visitations coincide with the International Geophysical Year, during which time the foremost scientists of all nations are seriously studying Earth and its actions.

Furthermore, we are being alerted to the existence of neighbors in space by their craft through our atmosphere. Prior to proof of their reality, a large majority of the people were unaware of human inhabitants on other planets. It is their sincere hope to bring us into the family of our Solar-System through knowledge.

Q5: Are space travelers like us?

A: Yes! Our spiritual teachings tell us we on Earth are created in the image and likeness of the Creator. Since this is true, and since this same Creator is the Father of the Cosmos and all contained therein, would not His children in other rooms in His house of many mansions also be like us? On Earth we have people of various sizes and colors; this same condition exists in other worlds. But while we divide these colors into races, the dwellers on other planets glorify their Father in His wisdom for bringing forth the variations of Himself. No one is judged by outward appearance, but all are revered for the Divine Life within.

Space travelers are identical to us, only they have a deeper understanding of themselves and the Cosmos of which we are all

inhabitants. When we, too, learn to master space travel, our concept of the Cosmos will be infinitely broadened.

Q6: Do the visitors support any specific form of Earth's society?

A: No. Such support would be complying with our custom of divisions. They recognize no false divisions of any kind. They understand Life is eternal, and every person is born to fulfill a definite destiny. Each must learn his own lessons as he travels the pathway of life. Many have mastered lessons that others have yet to learn; yet stretching before all is the eternal pathway without beginning or ending. Therefore, all are respected alike. So they have neither preference nor judgement for any specific form of our society.

Q7: Why do we not hear of space craft crashing as we did in the early 1950?

A: The early crashes were caused when the radiation in our atmosphere was taken into their craft through a process similar to our air conditioning systems. The crews became ill and lost fatalities had taken place, the crews on other ships began studying conditions and seeking ways to avoid such disasters. Now they have succeeded.

They have perfected a small object which each crew member carries on his person while their ship is moving through our atmosphere. A similar object on a such larger scale is used to purify the atmosphere with in their craft. No space person ever comes to Earth without one of these for protection to help him withstand the radiation present not only in our atmosphere, but in our food and water as well.

Q8: Why don't they give us such protection?

A: their instruments have been developed with minerals & elements from their own planets, therefore contain frequencies harmonious with the users. Protective objects for Earth's people must be constructed from the elements and mineals of our planet in order for them to blend with the frequencies of our bodies in their relationship to Earth. Research is now being conducted in an effort to work out the necessary details for such an instrument.

Q9: Why are space people so far ahead of us?

A: According to what they have told me, millions of years ago the peoples on other planets in our system began respecting one another as brothers and sisters of one planetary family, recognizing all as children of the one Infinite Creator. Without divisions, but with all working together harmoniously, they have been able to concentrate their efforts for constructive study and growth. As a result they have learned well the laws

of Nature and how She operates. This knowledge made it possible for them to understand the laws governing the harnessing of certain of Nature's forces, thereby enabling them to build ships patterned after their own planets, and eventually to travel beyond the confines of their worlds.

On the other hand, the history of Mankind on Earth has been filled with divisions and personal aspirarions. Destruction, rather than construction, has been our practice. Today we are reaping the rewards of this policy in disease, suffering and ignorance.

We assume the planet belongs to Man, with each claiming his small plot; while our neighbors in space realize their planet belongs to the Creator. So as one large family they share its products equally.

In divisions, we live as strangers to one another. In brotherhood, they live in peace and harmony.

Q10: Do they believe in God?

A: They glorify the Creator in their every thought and every action. We profess belief, and many give devout lip service, while inwardly doubting the practicality of living the Universal Laws which have been handed down through the centuries from Men of Wisdom.

In both the old and new Testaments of the Christian Bible, and in the teachings of all the Great Ones, we find the commandment of Love. "Love thy neighbor as thyself." To fully understand the true meaning of this commandment we must broaden our concept of the word 'neighbor'. Neighbor is not just the person living next door, but everyone in the world; everyone living on the other planets in our system; every one living in the vast, limitless Cosmos.

The Cosmos and Its entirety operates in perfect timing according to these laws of harmony. Comprehending this, our neighbors in space have found peace, health and a deep understanding of the true purpose of Life. Therefore, it is apparent as long as we harbor fear, hatred and greed in our hearts, we are not living our belief in God. True belief in God is a way of life.

Q11: Is there family life similar to ours?

A: Yes. Their intimate family life is very similar. Children are conceived and born the same as on Earth. Life is more joyous, for all are working and living for the common good. They work, study, play and participate in interests parallel to ours. By preference they are vegetarians, but not strictly so. Although they eat meat on occasions, they do not raise cattle for slaughter.

Their houses vary in size according to their family needs. All homes contain innovations to remove the drudgery from house-

❧ GAP-JAPAN ❧

GAP (Get-Acquainted Program) network was launched by the late Mr. George Adamski in 1956. The purpose of this program was to let many people know about the highly advanced civilizations on other planets in our solar system as well as Adamski's cosmic philosophy. During his lifetime, there were GAP organizations supporting Adamski in more than ten countries. Presently, only a few countries have such groups including Denmark, Japan, and England.

GAP-Japan was founded by Hachiro Kubota in 1961, who had been a Japanese co-worker of Adamski since 1953. The group has a membership of about 1,100 scattered all over the country. Besides this English version, the Japanese bulletin, 'UFO contactee' is published quarterly. With its 96th issue out, this newsletter has a circulation of 3,000, of which 1,500 copies are sold at the bookstores in large cities in Japan.

There are 18 branches of GAP-Japan in Osaka, Niigata, Fukuoka, Nagoya, and others.

The Tokyo headquarters hold a monthly meeting to study and practice Adamski's philosophy by using his books 'Science of Life', 'Telepathy' and other Japanese editions. On the average about 80 students attend the meeting every month. Respectively all the branches have a monthly meeting to study Adamski's cosmic philosophy by listening to tape recordings of Kubota's lecture from the Tokyo meeting.

In Tokyo, a general assembly is held in autumn of every year. On September 21, 1986, the annual general assembly was held in the metropolis, and Hachiro Kubota, representative of the Japanese GAP group and his good friend Mr. Shoichi Harukawa, the hero of the tremendous story contained in this issue, gave a lecture respectively. Harukawa's talk on the space people and civilizations on other planets in our solar system to which he was taken made a great impression on 400 listeners.

After the assembly, about 150 members enjoyed a dinner party at a well-known restaurant in Ginza where Mr. Harukawa was bombarded with questions.

Our basic concept is that the two most powerful countries have been covering up a great deal of information concerning the events on these planets though they know the situation well. We are sure the truth about UFOs and other planets will be open to the public in the future, at least by the end of this century, proving that Adamski told an absolutely true story.

work. With a zest for life, they enjoy community gatherings and competitive sports events. In other words, their lives are 'normal' by our standards. But they have overcome all jealous possessiveness, which is a blight haunting many families on Earth.

(Continued to the next issue)

Hachiro Kubota talking about UFOs and Adamski issues at the assembly. Shoichi Harukawa refused to be photographed.
